DOE Awards Peerless Technologies Support Services Contract to Ohio and New York Cleanup Sites

Cincinnati -- The U.S. Department of Energy (DOE) today made a small-business contract award to the Peerless Technologies Corporation, Fairborn, Ohio for support services to the Environmental Management Consolidated Business Center (EMCBC), here, and also to small cleanup sites managed by the DOE Office of Environmental Management. This contract was awarded under Section 8(a) of the Small Business Act and will have a \$3.5 million ceiling, with a three-year performance period and no extension options. Specific task orders will be issued against this contract.

In addition to providing support services to the EMCBC, the Peerless Technologies employees will also support Environmental Management small site projects that include; the Miamisburg-Mound Operating Unit (OU-1) Project, Miamisburg, Ohio and the West Valley Demonstration Project, West Valley, New York.

Services under this contract will include:

- project support
- risk analysis
- resource loading scheduling
- cost estimating
- technical support
- project analysis

A synopsis of this contract can be found on the *Federal Business Opportunities* website at:
